STAKEHOLDERS

Internal

The internal stakeholders who have a significant voice in any process changes.

1. Project Guide - The person who oversees the project and recommends changes and mentors the developers and testers.
2. Testers - People who test our product periodically during the development phase in order to improve its efficiency.
3. Developers - People who develop the application.
4. People who are in charge of maintaining the functioning of the app after it has been deployed commercially.

External

These are the parties or people outside of the development process who need to be involved in the functioning of the app. Their inputs are of key value to us in deciding aspects of the process. Those people are referenced here.

1. Students - They will employ the app to partake in quizzes which will be sorted according to the various categories and organisations.
2. Tutors/Teachers/Organisations - They will employ the app to conduct quizzes . Also, in future, they will be able to post content and lectures and will be able to authorize who have access to them.
3. Moderators - They will be responsible for moderating the content.
4. Advertisers

PRODUCT BACKLOG

Profile

- As a site member, I want to describe myself on my own page in a semi-structured way. That is, I can fill in predefined fields, but also have room for a free-text field or two. (It would be nice to let this free text be HTML or similar.)
- As a site member, I can fill out an application to become a content provider.
- As a content provider, I want my profile page to include additional details about me .
- As a site member, I can mark my email address as private even if the rest of my profile is not.
- As a site member, I can send an email to any member via a form.
- As a site administrator, I can read applications and approve or reject
- them.
- As a site administrator, I can edit any site member profile.

Categories

- As a content provider, I can create a new course or quiz. This includes the following information: name, description (HTML), setter names (multiple selection from a list), venue name (HTML) and address, contact name, contact phone, contact email, a link for more information, and a link to register. .
- As a site administrator, I can create quizzes (?) or Events that is not charged a listing fee.

- As a site administrator, I can set the listing fee per Other Course or quizzes.
- As a content setter, I can update one of my existing courses or events.
- As a content setter, I can delete one of my courses or events.
- As a content setter, I can copy one of my courses or events so that I can create a new one.
- As a site admin, I can delete any course or event.
- As a site editor, I can update any course or event.
- As a content setter, admin, or editor, I can turn a course into an event or an event into a course (in case it was entered in the wrong category). (Note: making something a Certification Course will probably require selecting the name of the course from the pre-approved list.)
- As a site visitor, when I'm viewing a course I can click on the content setter's name and be taken to the content setter's profile.

FAQ

.

- As a site visitor, I can read FAQs
- As a site editor, I can maintain an FAQ section.
- As a site member, I can do a full-text search of the FAQs. (Maybe we want this for any site visitor?)
